

Deb Gilletti

is moving on.... from the world of whimsy she has inhabited for eleven years now, on into a world of greater emotion. This prize winning artist brings you new things, wonderful things, artwork never to be repeated.

Firstly, a very special event- in a worldwide exclusive Deb's very first bronze sculpture will be shown at "Symbiosis", a piece which embodies and heralds her international career.

This shift to bronze has been nurtured by the immense challenges of working at "duos" pieces with Fay. They have both grown as artists, and been strengthened by the pressures of combining the pure forms from Fay's wheel with Debbi's Art Nouveau embellishments.

At "Symbiosis", you can delight in the tenderness and sensuality of lovers, the beauty of bodies, and the enticing joy of living.

Two years in the planning and development, "Symbiosis" will only happen once. It is daring, different, and just a little shocking. Make sure you don't let "Symbiosis" pass you by this year at the 2003 Australian Italian Festival
